**[Horizontal thermoform fill and seal: Calculating the real costs](#)**

If you've been seeking to enhance your existing automated operations and have previously rejected converting to horizontal thermoform fill and seal (HTFS) machinery, it just might be time to rethink that decision. White paper from Ossid explains why.

Ossid

**[Bagger stands less than 4' tall and fits into any space](#)**

The Vertek Junior from WeighPack Systems is the most affordable vertical form/fill/seal bagger on the market. This servo driven stainless-steel bagger can produce 50 bags/min with a finished bag width of 5" wide. Great for fractional packaging of coffee, spices, cheese, liquids, and candies, the Vertek Junior stands less than 4' tall and fits into any space.

WeighPack Systems Inc.
