

POST-CONSUMER RESIN

Lead the Green Packaging Revolution

Uses up to 70%
Post-Consumer Resin

Eco-Friendly
Packaging

Quality, Service
and Innovation

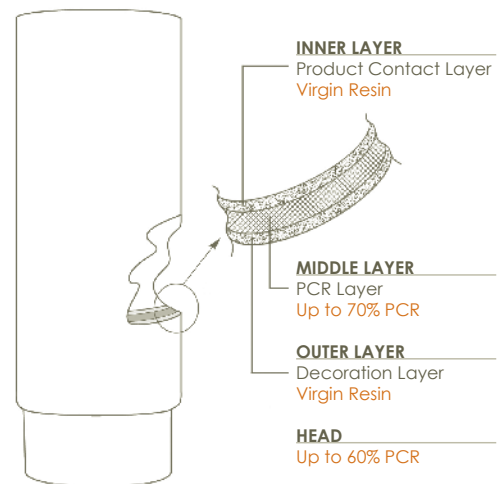

THE LEADER IN *eco-friendly* TUBE PACKAGING

Through strenuous R&D and manufacturing trials, CCL Tube has increased the amount of post-consumer resin used in the tube sleeve and commercialized the use of post-consumer resin in the tube head — *an industry first*.

Benefits Come in Threes

Our unique three-layer extrusion process isolates the PCR layer between the inner and outer virgin resin layers, preventing contact with the tube's contents. By using multi-layer extrusion, more marketers are able to use the PCR tube; especially those whose products might interact adversely with recycled materials. This layered approach ensures the accuracy and acceptance of high-end decorating and labelling.

PCR Tubes

- are environmentally friendly
- are virtually identical to virgin resin tubes
- demonstrate green packaging in action
- accept all standard forms of decoration
- contain up to 70% post-consumer resin
- may be used with all colorants

PCR TUBE SIZES	1" diameter and smaller	up to 50% PCR
	1-3/16" diameter and larger	50-70% PCR
AVAILABLE NECK FINISHES	M5, M8, B22-400, ND20.6, dome/slanted (3/4" only)	
DECORATING	1-8 color offset printing 1-6 color silkscreen printing Hot stamping Pressure sensitive labeling	

To learn how your company can integrate Post-Consumer Resin Tubes into your next plastic tube order, please contact our account executives or our customer service department at **310.635.4444 extension #186**.
