High-Speed
Vision Inspection

endless decorating options

CCL Tube's one-to-eight color offset printing combines perfectly with all other decorating technologies to achieve unique, *never-seen-before* designs. Artwork utilizing the eight-color offset process complements silkscreen printing, labelling and hot stamping, and the use of matte or high-gloss lacquers results in high-impact special effects.

CCL Tube Goes Digital

Digital plate-making replicates your original artwork with greater accuracy, resolution and consistency—through higher quality plates. Digital plate making reduces pre-press labor and material costs and is better for the environment.

AVAILABLE NECK FINISHES	M5, M8, B22-400, ND20.6 Dome/slanted (3/4" only)
ADDITIONAL DECORATING	1-6 color silkscreen printing Hot stamping Pressure sensitive labelling

CCL prints intricate and detailed artwork while maintaining superior registration, seamless gradation and consistent quality.

CCL's integrated pre-printing process provides greater ink opacity and better bar code readability resulting in more precise artwork replication.

CCL's eight-color offset printing machines are equipped with inline capping and push-on closure orientation, as well as orifice foil seal capabilities (Los Angeles).

CCL Los Angeles ensures artwork accuracy by utilizing a high-speed vision inspection system. Defects are identified and corrections are made immediately, which decreases waste and increases our output capacities.

To learn how One-to-Eight Color Offset printing can make your product stand out from the crowd, please contact your account executive or our customer service department at **310.635.4444 extension #186**.
