WORLD-CLASS PACKAGING

Complementing our standard decorating capabilities—one-to-eight color offset and one-to-six color silkscreen printing, hot stamping and labelling—we've commercialized a variety of decorating innovations to enhance and add interest to your tube decorating strategies.

Dazzling Packaging That Sparkles & Shines

Combining high-gloss metallic inks and spot varnishes adds glamour and sophistication. Innovative ink formulations and specialized curing techniques enable us to produce glitter and high-gloss effects.

Familiar Yet Unexpected

CCL Tube has commercialized pearlescence, wood grain and leather simulated silkscreen inks. On-site ink mixing capabilities enable us to work quickly and efficiently to develop original, *never-seen-before* effects that 'WOW' consumers.

Packaging With Definition & Dimension

Silkscreen printing over hot stamping adds definition and dimension. Create custom foil colors by silkscreen printing over the original foil. This technology enables customers to integrate metal effects in all custom colors and all gloss levels.

Touch, Feel & Functionality

CCL's cutting-edge silkscreen inks combine tactile silkscreen varnishes and gloss & matte inks to produce a superior package plus a built-in bonus; a nonslip finish great for shower and bath products.
